Html5, Javascript, CSS3, python, C, c++, React, Redux, tailwindcss, MaterialUI, Express, Nodejs, MongoDB, Redux-toolkit, Angular, Graphql

💼 EXPÉRIENCE PROFESSIONNELLE

Evold
Front end developer
11/2023 – present | Rabat (Remote), Morocco
- I Collaborated remotely with a team to develop and enhance a ticketing platform.
- I Implemented a feature that allows event hosts to edit the confirmation email (HTML or plain text) sent to customers upon ticket purchase.
- I Conducted code reviews to ensure code quality, maintainability, and adherence to best practices.
- I Integrated Google Tag Manager (GTM) on event pages to track sales and user interactions.
- I Integrated DoubleClick Campaign Manager (DCM) to allow event hosts to track marketing campaign performance and sales.
- I Set up Sentry profiling for performance monitoring and optimization across the platform.
- I Added a feature that enables event hosts to display donation requests to customers, facilitating charitable contributions.

Confledis
Full stack developer intern
08/2023 – 09/2023 | Paris, France
- I built with my team a mobile app with user-friendly interface that allowed users to search and locate doctors, schedule appointments, discover nearby laboratories, and identify hospitals within their preferred geographic regions.
- I collaborated closely with the remote development team, effectively communicating project goals, progress, and milestones to ensure a coordinated and successful development process.

TECH : Reactjs,Ionic,Styled-components,Css.

Agri4.0
Full stack developer intern
02/2023 – 06/2023 | Agadir, Maroc
- I built a fullstack app in the consulting field which was a marketplace that link consultants with companies .
- I built a frontend app in the farming industry where farmers can monitor and control their Bees ,I worked with a backend dev in this project.
- I built a frontend app in GIS field,the idea of the project is that users can choose any location in the world then they will get the ndvi ,ndwi... layers for this place plus a history of layers values, all this using sentinel hub api,I collaborated with a GIS engineer in this project.

TECH : Tailwindcss,Reactjs, Nodejs,Express,Mongodb
